

Tasty innovations needed?

Innovation, renovation and cost management solutions
to meet today's challenging snacks market.

Why Kerry?

We are experts in authentic flavour development and offer the most extensive product portfolio available today. Whether your need is for innovation or cost optimization, our application experts will work with you to create the right solution. We offer a valuable understanding of consumer trends and how they impact on your markets - making us your ideal partner.

Today's consumers are increasingly conscious of the health aspects of their diet and at the same time they will not compromise on the enjoyment of food. The challenge is to optimize the sensory appeal and health benefits of products in a cost effective way. Kerry has a new extended range of solutions to meet these challenges:

New!

SureFlow™ Flavourings

SureFlow™ flavourings provide snack manufacturers with greater application control, improved consistency, less down-time and reduced waste; leading to more efficient production and a superior quality, great tasting end product.

Mastertaste™

A full range of Natural cost effective Flavours including consumer acceptable solutions to tastes with a smoke or vinegar character. Also provenance ingredients and real foods to support your market positioning.

Umamex™ Y

Natural Flavour Enhancing technology for clean label declarations, such as MSG and Ribotide removal and sodium reduction.

Kokumex™

A range of mouth feel and textural modulators useful in fat reduction. To be launched at FIE 2009.
